

1 to the specific forms or arrangement of parts herein described
2 and shown. It will be apparent to those skilled in the art that
3 various changes may be made without departing from the scope of
4 the invention and the invention is not to be considered limited
5 to what is shown in the drawings and described in the
6 specification.

7 CLAIMS

8 What I claim is:

9 Claim 1. A golf accessory device to be mounted on a golf
10 club for retrieving golf tees, said golf club including an
11 elongated shaft with a handle end, said device comprising:

12 a base in the form of a grip surrounding said handle end,
13 said base having a top side surface, a bottom side surface, and
14 a periphery, said top side surface having a plurality of spaced
15 apart flexible, resilient fingers extending therefrom within
16 said periphery, said fingers each attached to said base, said
17 grip is integrally molded into said base;

18 said resilient fingers raised above said periphery of said
19 top side surface and spaced from each other a distance less than
20 the diameter of a golf tee;

21 said bottom side surface having a fastener for connecting
22 said device to said handle end of a golf club shaft;

23 whereby the golf club can be used for its intended purpose
24 and by reversing the golf club shaft, said flexible, resilient
25 fingers of said base are used to retrieve a golf ball tee.

26

1 Claim 2. A golf club accessory device according to claim
2 1 wherein said flexible, resilient fingers are shaped to retain
3 the golf tee between the fingers.

4

5 Claim 3. A grip for a golf club having a shaft with a
6 handle end, said grip comprising an elongated tubular extension
7 for fitting around the handle end of the golf club, said tubular
8 extension having an open end and a closed end, said closed end
9 having flexible fingers adapted to frictionally engage a golf
10 tee.
